Smart Tech Use for Equity

Note: These questions are drawn from “Smart Tech Use for Equity,” a feature story written by Mica Pollock for Teaching Tolerance magazine (Issue 52).

What’s your equity vision for students in your classroom?

What tech use did you experiment with to see if it could help achieve that vision?

What did you do with your students to test that use of tech, and how did it go?

What’s your conclusion about how “smart” that tech use was for achieving your equity vision?
